Pecos Co. result expand Wolfcamp potential

A well drilled by **PT Petroleum** in Pecos Co., Texas expands the Wolfcamp in the Delaware Basin to the southeast. Located 10 miles southwest of Ft. Stockton, the Cunning Wolf UL-602H well IPed 1,256 bopd (49°API) & 401 Mcfd on a 28/64-in. choke with 1,000 psi casing pressure.

PT Petroleum's Cunning Wolf UL-602H flowed 1,322 boepd (95% oil).

Terrace Energy applied for the well permit but subsequently sold assets, including the well to private operator PT. Spud at the

end of Q1, the well was drilled to 12,607 ft MD (8,696 ft TVD) by rig operator **Precision Drilling**. The top of pay was intersected at 8,073 ft. Casing of 12.375-in. was set to 1,640 ft and 9.625-in. to 7,338 ft. The well was perforated between 8,467-12,610 ft and the plugback set at 8,548 ft.

"We estimate that the well is at least 40 miles east of current horizontal activity in southeast Reeves Co., where operators are primarily targeting the upper Wolfcamp," said **Wells Fargo's** David Tameron in an analyst note.

Spraberry leading permitting activity in West Texas

More than 130 permits were issued in the last few weeks for the Spraberry in the Permian Basin. The leader in number of permits issued was **Pioneer PIONEER Natural Resources** with 19. **NATURAL RESOURCES** of those permits are for horizontal Pioneer plans to drill 12 horizontals in Martin, Reagan and Upton Cos. and seven

vertical wells in Glasscock, Martin, and Midland Counties. **Apache** came in at a close second with 18 permits in Glasscock, Reagan and Upton Counties. Nine of those permits are for horizontal wells and one was for the recompletion of the Ed Books 6-4 well in Glasscock County.

Other operators including **Athlon FE Operating** (8 permits in Glasscock and Howard Co.), **COG Operating** (4 permits in Upton Co.), **Energren** (6 permits in Dawson, Howard, and Martin Cos.) and **XTO Energy** (2 permits in Upton Co.) are also planning to drill a number of Spraberry wells.

EOG Wolfcamp wells tests 1,155 boepd total

EOG Resources completed two horizontal wells at Lin field in Crockett Co., Texas with the wells flowing a cumulative 1,155 boepd. The University 38 R-0703H well achieved a gas-lift assisted rate of 486 bopd (43°API) & 854 Mcfd from the Wolfcamp on an open choke with 950

EOG was issued six permits to drill Wolfcamp wells in Lin field.

psi casing pressure during a 24-hour test. Producing from the same formation, the University 38 R-0704H was completed one day later and yielded 335 bopd (43°API) & 1,153 Mcfd on an open choke with 580 psi FTP and casing pressure of 930 psi.

ABOUT PLS

The **Permian Oil Scout** is published every two weeks by PLS Inc.

This Permian Basin report will include stories and graphics highlighting local drilling activities, discoveries, new developments plus stats on new drilling permits, completions and P&A activity for West Texas (RRC 7C, 8 and 8A) and Southeast New Mexico (Chaves, Eddy, Lea, Otero and Roosevelt).

QUICK STATS

• **Athlon Energy** plans to drill its first four horizontal wells by year's end with two in Midland Co. and two in Glasscock.

• **Active rigs in the Permian averaged 468** (458 oil and 10 gas) during August, according to **Baker Hughes**. The count was flat vs. July and down 9% YOY.

• **BlackBrush Energy** has opted not to use water in its fracking operations. Instead a butane-rich mix is being utilized.

• **Diamondback Energy** has committed to pay \$440 million for a 20% royalty interest in 15,000 gross acres in Midland Co. from an undisclosed seller. Current production

DIAMONDBACK Energy on the acreage is 7,500 boepd from 177 vertical wells. Diamondback sees horizontal potential in the Spraberry, Wolfcamp and Cline.

• During Q2, the 62 net Wolfberry verticals **Energen** drilled in the Midland Basin averaged 24-hr IPs of 114 boepd (78% oil) and 30-day rates of 96 boepd. The company projects 190,000 boe EURs for the wells which cost \$2.5 million each.

• **Forest Oil** is selling a portion of its undeveloped Permian acreage for \$35 million. The assets include 58,200 acres (90% WI) in Crockett County. Forest is retaining its 68,250 acres (93% WI) in Reeves and Pecos Counties.

• **Pioneer Natural Resources** CEO Scott Sheffield called the Spraberry Wolfcamp "possibly the largest oil and gas discovery in the world."

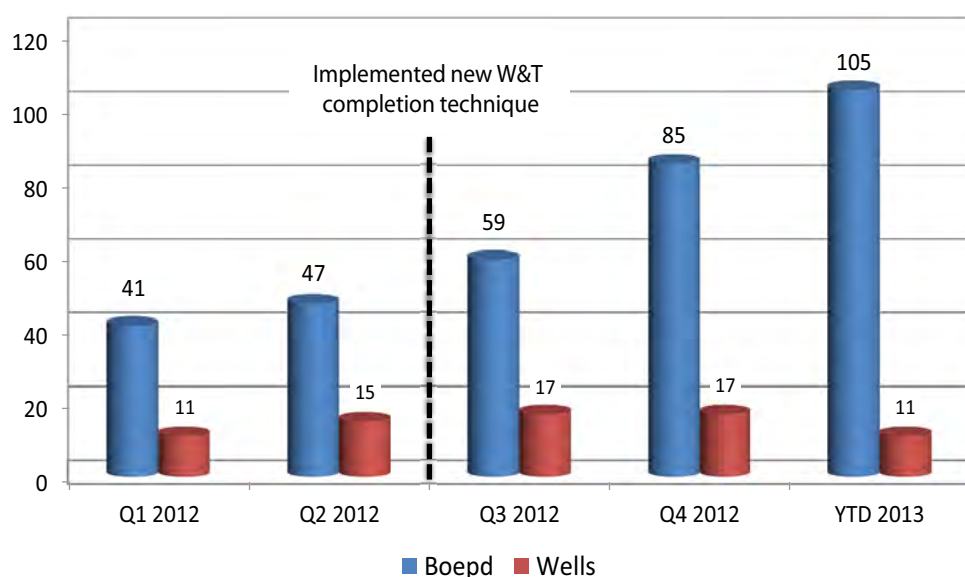

• **Over 29 Bbbl of oil and 75 Tcf** have been produced from the Permian Basin and the recoverable volumes that remain exceed what has been produced over the last 90 years, according to the Texas Railroad Commission.

• The Wolfcamp and Bone Spring are expected to drive Permian growth, according to Wood Mackenzie. Together they could produce 1.0 MMBopd by 2018.

Regional Intelligence & Business Opportunities

Serving the local marketplace with drilling activities, permits and multiple listings

In an industry where the next well permit or completion may highlight a developing trend or new play, it's important to stay out in front of the rigs.

PLS now helps E&P companies and service providers access this important industry activity through regional reports.

Like our national coverage, these regional reports blend important industry news with new business opportunities—while also listing local discoveries, drilling permits, completions, P&A activity and drilling stats.

So if your aim is to stay out in front of prospects and plays, shouldn't you take these new reports for regional market intelligence?

Available regional reports include the **Southeastern**, **South Texas**, **Permian** and **MidContinent Oil Scout** (Ark-La-Tex & Appalachia Oil Scout coming soon).

Call today, **713-650-1212**. Subscriptions start \$195-\$295/yr.
